TO WHOM IT MAY CONCERN

Diabetic foot care division of Jain Institute of Vascular sciences, unit of Bhagwan Mahaveer Jain Hospital is one of the leading diabetic foot care providers in India, seeing about 2000 patients/month. We have used anodyne (MIRE) therapy from last 5 years, in about 1800 patients. The therapy has provided significant, sustained relief from diabetic neuropathic symptoms of the feet in about 80% of the patients. This has minimum maintenance and we continue to use is now and in future.

Dr. K.R. Suresh,

Vice president – Diabetic foot society of India

Editorial Board – Annals of Vascular Surgery (USA)

Immediate Past president – Vascular Society of India
